

MAHESH WAKADE

Senior Frontend Engineer | Angular Developer | Ionic & Hybrid Mobile Developer

wakade.mahi@gmail.com | +91 9527451327 | [linkedin.com/in/wakademahi0210](https://www.linkedin.com/in/wakademahi0210) | Portfolio: wakademahi.github.io | Pune, India

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of experience architecting and delivering enterprise-scale web and hybrid mobile applications using Angular (2–18), TypeScript, JavaScript, Ionic Framework, RxJS, HTML5, CSS3, and SCSS. Proven expertise in reusable component architecture, responsive UI, REST API integration, performance optimization, lazy loading, code reviews, and mentoring. Delivered 20+ production releases across Manufacturing, Employee Engagement, and Business Automation domains using Agile Scrum methodology. Self-driven learner exploring Micro Frontend architecture (Native Federation) through independent project work.

CORE COMPETENCIES

- Enterprise Web & Hybrid Mobile Application Development
- Reusable Component Development & Design Systems
- Ionic Framework & Capacitor
- TypeScript & JavaScript (ES6+)
- REST API Integration & Angular Reactive Forms
- Lazy Loading & Performance Optimization
- Cross-Platform Mobile Development (Android & iOS)
- Code Reviews, Mentoring & Cross-Functional Collaboration
- Agile Scrum Methodology
- Micro Frontend Concepts (Native Federation) — Personal Project

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS

Frontend Frameworks: Angular (2–18), AngularJS, RxJS, Ionic Framework, Capacitor, Bootstrap, Angular Material

Architecture: Component Architecture, Lazy Loading, Route Guards, Reactive Forms, Dependency Injection, REST API Integration, Performance Optimization, Angular Standalone Components

Tools: Git, Jira, Postman, VS Code, Chrome DevTools

Build & Deployment: Android Build & Deployment (Google Play Store), iOS Build & Deployment (Apple App Store)

Currently Exploring (Self-Learning): Micro Frontend Architecture (Native Federation, Module Federation), React.js (Basic)

PROFESSIONAL EXPERIENCE

Sr. Software Engineer – Frontend & Hybrid Mobile Developer

Sep 2018 – Apr 2026

Greentin Solutions Pvt. Ltd. | Pune, India

- Designed and developed enterprise-scale Angular web and hybrid mobile applications across 5+ enterprise modules, improving application scalability and maintainability.
- Designed and engineered reusable Angular components and shared UI modules, reducing development effort by approximately 40% and improving maintainability.
- Implemented complex Angular Reactive Forms with custom and dynamic validation.
- Integrated 50+ REST APIs using Angular HttpClient and RxJS to enable seamless communication with enterprise backend services and improve application responsiveness.
- Improved application performance by approximately 30% through Lazy Loading, optimized Change Detection, and code splitting.
- Led the frontend integration of the myNu AI Assistant, enabling AI-powered duplicate suggestion detection and reducing duplicate entries by 40%.
- Conducted code reviews, mentored junior developers, and promoted coding standards and best practices to improve overall code quality.
- Collaborated with cross-functional teams to deliver 20+ production releases using Agile Scrum methodology.

- Contributed to sprint planning, effort estimation, release planning, and production deployments to ensure timely delivery of enterprise applications.

Environment: Angular 16, AngularJS, TypeScript, RxJS, Ionic Framework, Capacitor, REST APIs, Bootstrap, SCSS, Git, SQLite, Firebase Push Notifications.

Hybrid Mobile Application Developer

Jul 2017 – Aug 2018

Edynamics Business Services LLP. | Pune, India

- Expanded and deployed hybrid mobile applications using Ionic Framework, Cordova, and Angular.
- Collaborated with backend teams on MySQL integration, ensuring smooth data flow and optimized application performance.
- Delivered scalable and user-friendly mobile solutions for ERP and CRM systems in the real estate domain.
- Contributed to the company's Business Management Systems (BMS) platform, aimed at simplifying operations for small, medium, and large-scale enterprises across India.

Web Developer

Jan 2016 – Jun 2017

Exuberant Systems Pvt. Ltd. | Pune, India

- Engineered and launched full-stack web and mobile applications using Ionic and Angular, reducing development time by 20% through the creation of a reusable UI component library.
- Worked with Ionic Material, Angular Material, Cordova, and PHP (CodeIgniter) for frontend development and MySQL for backend integration.
- Collaborated with designers and backend teams to deliver user-friendly, responsive applications aligned with client business needs.

PERSONAL PROJECTS (SELF-INITIATED)

Micro Frontend Sample Application — Personal GitHub Project

- Built a self-driven sample application on personal GitHub to explore Micro Frontend architecture using Angular Native Federation and Module Federation.
- Designed independently deployable Angular modules to learn modular architecture patterns, outside of any organizational project.

Environment: Angular, Native Federation, Module Federation, TypeScript, Git.

React Sample Application — Personal GitHub Project

- Built a standalone React (Vite + JavaScript) sample application featuring a list UI, details page, search functionality, and REST API integration.
- Self-driven project to explore React fundamentals and component-based development outside of Angular.

Environment: React, Vite, JavaScript, REST APIs, Git.

KEY PROJECTS

myeNovation – Employee Engagement Application

- Led frontend development of an enterprise employee engagement platform using AngularJS and Ionic Framework.
- Integrated the myNu AI Assistant, enabling AI-powered duplicate suggestion detection and improving data accuracy by 40%.
- Built responsive web and hybrid mobile applications for Android and iOS with offline storage, push notifications, and camera integration.

Environment: Angular 18, AngularJS, HTML5, CSS3, Bootstrap, Ionic Framework, Capacitor, REST APIs, Git.

Skill Matrix

- Created a tool for visual skill mapping and gap analysis across various roles and responsibilities.
- Aided in strategic planning for workforce training and resource allocation.

Environment: Angular 12, HTML5, CSS3, REST APIs, Git.

PACE – Skill Enhancement Platform

- Built modules for training sessions, competency tracking, and certifications, enabling continuous learning and evaluation automation.
- Delivered mobile-ready modules using Ionic Framework.

Environment: Angular 12, Ionic Framework, Capacitor, HTML5, CSS3, REST APIs, Git.

Call Manager App (Business OS Platform)

- Developed an enterprise call tracking and lead management application to streamline customer interactions and business workflows.
- Built responsive Angular/Ionic modules with cloud telephony integration, call routing, and customer engagement features.

Environment: Ionic Framework, Angular, HTML5, CSS3, Bootstrap, REST APIs, Cordova, Git.

DOMAIN EXPERIENCE

Manufacturing: Employee Engagement Platform, Kaizen Management, Audit Management, Skill Matrix, Performance Management System

Business Automation: Workflow Automation, Enterprise Mobility, Business Management System (BMS)

HRTech: Performance Management System, Employee Skill Development, Payroll Management

Real Estate: Property Management, CRM Solutions

AI Integration: AI-powered Suggestion Recommendation, Duplicate Detection

KEY ACHIEVEMENTS

- Developed enterprise applications used across multiple manufacturing organizations.
- Integrated AI-powered duplicate suggestion detection, reducing duplicate entries by 40%.
- Delivered Android and iOS applications using Ionic Framework.
- Improved application performance by ~30% through Lazy Loading and reusable component architecture.
- Explored Micro Frontend architecture (Native Federation) through a self-built personal project to strengthen modular application design skills.
- Mentored junior developers and participated in code reviews.

EDUCATION

Master in Computer Science — PCCCS, Chinchwad, Pune University — 2016 (63.44%)
